

Installed Extensions

Applications Menu by [fmuellner](#)

System extension

Add a category-based menu for applications.

Auto Move Windows by [fmuellner](#)

System extension

Move applications to specific workspaces when they create windows.

Bluetooth Quick Connect by [bjarosze](#)

System extension

Allow to connect to paired devices from gnome control panel.

Burn My Windows by [Simme](#)

Disintegrate your windows with style.

Dash to Dock by [michele_g](#)

System extension

A dock for the Gnome Shell. This extension moves the dash out of the overview transforming it in a dock for an easier launching of applications and a faster switching between windows and desktops. Side and bottom placement options are available.

Dash to Panel by [charlesg99](#)

An icon taskbar for the Gnome Shell. This extension moves the dash into the gnome main panel so that the application launchers and system tray are combined into a single panel, similar to that found in KDE Plasma and Windows 7+. A separate dock is no longer needed for easy access to running and favorited applications.

Desktop Icons NG (DING) by [rastersoft](#)

System extension

Adds icons to the desktop. Fork of the original Desktop Icons extension, with several enhancements .

EasyScreenCast by [adangel](#)

This extension simplifies the use of the video recording function integrated in gnome shell, allows quickly to change the various settings of the desktop recording.

 **Extensions** by [petres](#) ON ⋮ ■ ■

Enable/disable easily gnome shell extensions from a menu in the top panel. Also allows to edit the settings of the extensions. Feedback welcome!

 **Extensions Sync** by [alperenelhan](#) ON ⋮ ■ ■

Syncs gnome shell keybindings, tweaks settings and extensions with their configuration across all gnome installations

 **Freon** by [UshakovVasilii](#) ON ⋮ ■ ■

Shows CPU temperature, disk temperature, video card temperature (NVIDIA/Catalyst/Bumblebee&NVIDIA), voltage and fan RPM (forked from xtranophilist/gnome-shell-extension-sensors)

 **Launch new instance** by [fmuellner](#) ⋮ ■ ■

System extension

Always launch a new instance when clicking in the dash or the application view.

 **Native Window Placement** by [fmuellner](#) ON ⋮ ■

System extension

Arrange windows in overview in a more compact way.

 **Places Status Indicator** by [fmuellner](#) ON ⋮ ■

System extension

Add a menu for quickly navigating places in the system.

 **Proxy Switcher** by [flannable](#) ON ⋮ ■

System extension

Switches between the system proxy settings profiles defined in Network Settings.

 **Removable Drive Menu** by [fmuellner](#) ON ⋮ ■

System extension

A status menu for accessing and unmounting removable devices.

 **Screenshot Window Sizer** by [fmuellner](#) ON ⋮ ■

System extension

Resize windows for GNOME Software screenshots

Sound Input & Output Device Chooser by [kgshank](#)

System extension

Shows a list of sound output and input devices (similar to gnome sound settings) in the status menu below the volume slider. Various active ports like HDMI , Speakers etc. of the same device are also displayed for selection. V20+ needs python as dependency. If you want to continue with the old method without Python, use options to switch off New Port identification. But it works with only English

system-monitor by [Cerin](#)

System extension

Display system information in GNOME Shell status bar, such as memory, CPU, disk and battery usages, network rates...

Tiling Assistant by [Leleat](#)

System extension

Expand GNOME's 2 column tiling and add a Windows-snap-assist-inspired popup...

Ubuntu AppIndicators by [didrocks](#)

System extension

This a mock extension. It does nothing if installed from extensions.gnome.org. Please use KStatusNotifierItem/AppIndicator Support which provides the same functionalities. This name is used to protect and reserve the name for ubuntu appindicator, available as a system extension on ubuntu. This allow us to not trump updates outside of our QA process via an external upload.

User Themes by [fmuellner](#)

System extension

Load shell themes from user directory.

Volume Mixer by [alexhofbauer](#)

System extension

Applet allowing separate configuration of PulseAudio mixers.

Window List by [fmuellner](#)

System extension

Display a window list at the bottom of the screen.

windowNavigator by [fmuellner](#)

System extension

Allow keyboard selection of windows and workspaces in overlay mode. <Ctrl>number selects a workspace, and <Alt>number selects a window.

Workspace Indicator by [fmuellner](#)

System extension

Put an indicator on the panel signaling in which workspace you are, and give you the possibility of switching to another one.
